NOTICE OF EXEMPTION

MELISSA WILK, County Clerk
By  Deputy

TO: County Clerk
County of Alameda
1106 Madison St. – First Floor
Oakland, CA 94607

FROM: City of Livermore
1052 South Livermore
Livermore, CA 94550

SUBJECT: NOTICE OF EXEMPTION in compliance with the California Environmental Quality Act.

PROJECT

Title: City Ventures Parkview Condominium Project: Vesting Tentative Parcel Map 11473 (SUB) 24-001; and Site Plan Design Review (SPDR) 24-001

Location: Northwest of Portola Avenue and Rincon Avenue, east of Isabel Avenue (APN: 99-100-30-8)

Description: The development is a for-sale residential project and consists of three-story condominium buildings with 31 total units, including six units affordable to buyers with median and moderate-income levels, and four accessible units. The development also includes landscaping, parking, and frontage improvements.

Applicant: Kian Malek, City Ventures
City's Contact: Emily LaDue, Planning Technician
Telephone: (925) 960-4462
Public Agency Approving Project: City of Livermore

CLERK'S CERTIFICATE OF POSTING. Pub. Res. 21152: I certify that a copy of this document was posted at the Recorder's Office, Oakland, CA. for the period prescribed by law.

EXEMPT STATUS:

Executed at **COUNTY CLERK**
Oakland, CA
Date 9.16.2024 By  Deputy

- Categorical Exemption (Sec. 15303 (e))
- Declared Emergency (Sec. 15269(a); 21080(b)(3))
- Emergency Project (Sec. 15269(b)(c); 21080(b)(4))
- Ministerial (Sec. 15268; 21080(b)(1))
- Statutory Exemption (Sec. 15182(c), residential projects that implement a Specific Plan, and 15183, projects consistent with a Zoning Action
- "Common Sense" Exemption (Sec. 15061(b)(3)) The possible environmental impacts of the project have been considered in making this determination, as explained below.

Reasons why project is exempt:

State CEQA Guidelines Section 15182(c) and California Government Code Section 6545

The proposed project is exempt from the California Environmental Quality Act (CEQA) per State CEQA Guidelines Section 15182(c) and California Government Code Section 6545, which exempts residential projects that implement a Specific Plan, where:

1. A public agency has prepared an EIR on a Specific Plan after January 1, 1980, and the

residential project conforms to the Specific Plan.

- a. Findings: The Isabel Neighborhood Specific Plan and its Supplemental EIR were adopted and certified in 2020 (SCH #2016042039). The project is located within the Specific Plan's Transition Zoning district. The project is consistent with the allowed residential uses of the Transition zoning district and is within the minimum and maximum densities of 15 to 25 dwelling units per acre. All required development standards with respect to setbacks, height, open space, and parking have been met, upon making the findings to grant the requested density bonus waiver. The project provides more open space than required through the provision of, private yards, porches, and balconies, while meeting street frontage setbacks with well landscaped frontages, and is within the minimum and maximum required parking. The project provides frontage improvements along Portola frontage including Class 2b bike lanes, as required by the Active Transportation Plan. Proposed building architecture has a high-quality contemporary design with articulated facades, plane changes, deep window reveals, and multiple material types, as required by the Specific Plan and citywide Design Standards and Guidelines.

As called for in the Specific Plan, the project provides six for-sale affordable units to residents with moderate and median incomes. The project also implements Specific Plan policies for a walkable neighborhood that provides housing variety by proposing for-sale unit types with a range of floor plans and connecting the site to the existing pedestrian circulation network through multiple connection points. The proposed landscape plan conforms to Specific Plan and Design Standards and Guidelines standards by exceeding the required number of trees per acre and providing large shade trees along walks and the public right-of-way. Specific Plan sustainability requirements are also satisfied given that the project proposes rooftop solar arrays, California native landscape species, and electric vehicle charging spaces. The project is conditioned to comply with the Mitigation, Monitoring, and Reporting Program (MMRP) adopted with the certified 2020 Supplemental EIR. In addition, the applicant prepared Phase I & II Environmental Site Assessment (Phase I & II), geotechnical, topographic, and noise studies that found no significant impacts would occur beyond those identified in the EIR. For these reasons, the project wholly conforms with the Isabel Neighborhood Specific Plan, which was prepared and approved after January 1, 1980.

2. No events described in CEQA Guidelines 15162 have occurred.

- a. Findings: No substantial project changes are proposed which would require major revisions to the previous Supplemental EIR. The project proposes 31 residential units, consistent with the allowed uses and densities contemplated in the Supplemental EIR. Substantial changes in circumstances have not occurred requiring major revisions to the previous Supplemental EIR, as the site remains vacant, rough graded in the developable areas, and is surrounded by urban development. There is no new information of substantial importance that would result in new impacts not previously discussed, result in more severe impacts, or require modifications to the existing mitigation measures. The

applicant-prepared Phase I & II, geotechnical, topographic, and noise studies found no significant impacts would occur beyond those identified in the EIR and did not yield any new information of substantial importance. For these reasons, no events described in CEQA Section 15162 have occurred and therefore no further environmental review is required.

State CEQA Guidelines Section 15183

The proposed project is exempt under the California Environmental Quality Act ("CEQA") pursuant to California Public Resources Code Section 21083.3 and CEQA Guidelines Section 15183, which exempts projects consistent with a Community Plan, General Plan, or Zoning where:

1. The project is consistent with a Community Plan, General Plan, or Zoning Action for which a Lead Agency has certified an EIR.
 - a. Findings: An Isabel Neighborhood Specific Plan (Specific Plan) zoning district was established as part of the overall Specific Plan project, as approved by City Council in November 2020. Therefore, the Specific Plan can be considered a "Zoning Action" for purposes of California Public Resources Code section 21083.3 and CEQA Guidelines Section 15183. The City Council certified the Specific Plan's Supplemental EIR (SCH #2016042039) in November 2020 with Specific Plan adoption.

The Project is consistent with the uses, densities, development standards, and design requirements of the Specific Plan. Given that State law supersedes local ordinance, the Project's use of State Density Bonus Law to waive the INSP Scenic Corridor Amendment Area Policy requirements related to building height does not result in a Specific Plan inconsistency. The project is located within the Specific Plan's Transition Zoning district. The project is consistent with the allowed residential uses of the Transition zoning district and is within the minimum and maximum densities of 15 to 25 dwelling units per acre. All required development standards with respect to setbacks, height, open space, and parking have been met, upon making the findings precedent to granting the requested density bonus height waiver, and all design requirements have been fulfilled. The project provides more open space than required through the provision of private yards, porches, and balconies, while meeting street frontage setbacks with well landscaped frontages, and is within the minimum and maximum required parking. The project provides frontage improvements along Portola Avenue frontage including Class 2b bike lanes, as required by the Active Transportation Plan.

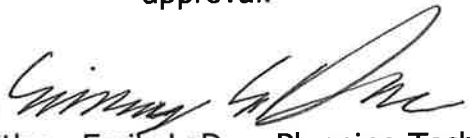

As called for in the Specific Plan, the project provides six for-sale affordable units to residents with moderate and median incomes. The project also implements Specific Plan policies for a walkable neighborhood that provides housing variety by proposing for-sale unit types with a range of floor plans and connecting the site to the existing pedestrian circulation network through multiple connection points. The proposed landscape plan conforms to Specific Plan and Design Standards and Guidelines standards by exceeding the required number of trees

per acre and providing large shade trees along walks and the public right-of-way. Specific Plan sustainability requirements are also satisfied given that the project proposes rooftop solar arrays, recycled water use for irrigation, California native landscape species, and electric vehicle charging spaces. For these reasons, the Project is consistent with a Zoning Action for which a Lead Agency has certified an EIR.

2. Project-specific impacts are not peculiar to the project site.
 - a. Findings: There are no specific significant environmental effects which are peculiar to the Project or Project Site, as stipulated in CEQA Guidelines subsection 15183(b)(1) through (b)(4), and as described below:
 - i. Impacts Peculiar to the Project. The Project is consistent with the uses and intensities contemplated in the Specific Plan. Since Specific Plan adoption, no substantial changes have occurred to the project site nor its surroundings. The site remains undeveloped, rough graded in the areas to be developed, and surrounding parcels are still residential in nature. The applicant prepared Phase I & II, geotechnical, topographic, and noise studies that found no significant impacts would occur beyond those identified in the EIR. For these reasons, no additional project-specific impacts have occurred that are peculiar to the project site.
 - ii. Environmental Impacts not Previously Analyzed as Significant. The Project is consistent with the uses and intensities contemplated in the Specific Plan, therefore, all potential Project impacts have been previously anticipated and analyzed in the Specific Plan EIR. In addition, the project is conditioned to comply with the Mitigation, Monitoring, and Reporting Program (MMRP) adopted with the certified 2020 Supplemental EIR. The Project will implement the mitigation measures, reducing significant project impacts to a less than significant level. The City Council adopted a Statement of Overriding Considerations with the certified 2020 Supplemental EIR. The project will not exacerbate any significant Impacts deemed acceptable in the Statement of Overriding Considerations. The applicant also prepared Phase I & II, geotechnical, topographic, and noise studies that found no significant impacts would occur beyond those identified in the EIR. For these reasons, there are no significant environmental impacts that were not previously analyzed.
 - iii. Potentially Significant Offsite or Cumulative Impacts. Since Specific Plan adoption, no substantial changes have occurred to the project site nor its immediate surroundings. Surrounding residential uses that were present during the 2020 Supplemental EIR analysis remain. While a majority of vacant parcels surrounding the project site remain since adoption of the 2020 Supplemental EIR, five new residential projects in the Specific Plan located west of the project site were approved over the last two years and

are currently under construction. The approved projects are consistent with the use and density contemplated in the 2020 Supplemental EIR. Therefore, the EIR already anticipated the cumulative impacts of these projects. For these reasons, there are no potentially significant offsite or cumulative impacts not previously analyzed in the 2020 Supplemental EIR.

- iv. Substantial New Information. Since Specific Plan adoption, no substantial changes have occurred to the project site nor its surroundings. The site remains undeveloped, rough graded in developable areas, and surrounding parcels are still residential in nature. The applicant also prepared Phase I & II, geotechnical, topographic, and noise studies that found no significant impacts would occur beyond those identified in the EIR. For these reasons, there is no substantial new information that was not known at the time of EIR adoption.
- v. Uniform Mitigations and Development Standards. The Project is subject to complying with all applicable mitigation measures adopted pursuant to the Mitigation Monitoring and Reporting Program (MMRP) for the Specific Plan's 2020 Supplemental EIR in addition to the uniformly applied development standards of the Specific Plan and Livermore Development Code. The combination of applicable mitigation measures and uniform standards would reduce all potentially significant impacts to a less than significant level. The applicant, or their successors in interest, is required to implement applicable mitigation measures applicable through conditions of approval.
